ISO 27001  
INFORMATION  
SECURITY  
MANAGEMENT  
SYSTEM

In today's knowledge economy, IT systems are crucial to the way in which we conduct business. Few companies could trade without access to electronic information. Therefore, the information is an important asset and any breach to its confidentiality, availability and integrity will have an immense impact on an organisation's business standing. Thus, it is vital that any systems holding valuable information need to be protected through the use of an Information Security Management System (ISMS).

An effective ISO 27001 management system can help safeguard site information security, achieve customer satisfaction, business efficiency and minimise business losses whilst creating a positive impact on your company image in the business community and with prospective clients.

### WHAT IS ISO 27001 STANDARD

The ISO 27001 is an international standard that outlines demands for an Information Security Management System (ISMS). Since organisations are all different an ISMS is always tailored to manage the companies specific security needs.

The purpose of ISO IEC 27001 is to help organisations to establish and maintain an ISMS. While ISO IEC 27001 say that you must meet all requirements, exactly how you do this is up to you and will depend on your businesses objectives, its unique Information Security risks and requirements and the needs and expectations of all interested parties. It will also be influenced by its inherent complexity and its corporate content. Exactly how you apply the standard will depend upon your organisations structure, its legal, regulatory , and contractual obligations, and the processes it uses to deliver its products and service.

### BENEFITS OF ISO 27001 STANDARD

- \* Ensure compliance with the legal and regulatory requirements.
- \* Independently verify that your organisational risks are properly identified, assessed and managed, while formalising information security processes, procedures and documentation.
- \* Continually monitor your organisation's performance.

### WHY DAS?

At DAS, we believe in certification with a partnership approach. Building and sustaining a positive and supportive relationship with our clients is at the heart of our working principle.

With a team of highly competent system auditors, we provide the confidence that organisations are seeking, implementing framework by taking a systematic approach to manage their business process while meeting customer regulatory requirements.

### NEXT STEP

Following your enquiry and completion of our application form, we will review the information and provide you with a free estimate.

There are no fees until you accept the estimate and return the signed contract that includes the conditions for certification.

We will contact you to start the certification process and agree on dates for the Stage 1 Audit. The assigned auditor will contact you to finalise the arrangements.

### YOUR ROUTE TO CERTIFICATION
