2 – Standardised but diverse IT platforms, servers, databases, networks etc

3 – High diversity of complexity of IT

Previously demonstrated performance of the ISMS

1 - Recently certified or not certified but ISMS fully implemented over several audit and improvement cycles

2 – Recent surveillance audit or not certified but partially implemented ISMS

3 – No certification and no recent audits or ISMS is new and not fully established

Applicability of sector specific risk

1 - Low risk business without regulatory requirements

2 - High regulatory requirements

3 - High risk business with (only) limited regulatory requirements

Extent of outsourcing and third party arrangements:

1 – no outsourcing and little dependency on suppliers

2 – well-defined, managed and monitored outsourcing arrangements

3 – outsourcer has a certified ISMS

4 – relevant independent assurance reports are available

5 – several partly managed outsourcing arrangements

6 – high dependency on outsourcing or suppliers with high impact

7 – unknown amount or extent of outsourcing or several unmanaged outsourcing arrangements

Extent of information system development:

1 – no in-house system development or use of standardised software platforms

2 – use of standardised software platforms with complex configuration or highly customised software or some development activities (in-house/outsourced)

3 – extensive internal software development activities with several ongoing projects for important business purposes

When do you expect to be ready for the Main Certification visit to take place?

Legal regulations applicable to the company

Is the English Language spoken by all staff?

 YES NO
